

METHOD AND SYSTEM FOR DYNAMIC DISTRIBUTED DATA CACHING

ABSTRACT OF THE DISCLOSURE

5 A method and system for dynamic distributed data caching
is presented. The method includes providing a cache community
(402) comprising at least one peer (413). Each peer has an
associated first content portion (511) indicating content to
be cached by the respective peer. A client (404) may be
allowed to join the cache community. A peer list (426)
10 associated with the cache community is updated to include the
client. The peer list indicates the peers in the cache
community. A respective second content portion (511) is
associated with each peer based on the addition of the client.
